

## Compatibility with Android

1/31/2019

USB/Bluetooth connection failure may occur on some Android devices that support the OS requirements, since the Android manufactures customize their own devices.

- USB-MIDI compatible system is required when connecting with USB-MIDI.
- USB Audio Device Class (Asynchronous) compatible system is required when connecting with USB-Audio.
- Advanced Audio Distribution Profile (A2DP) compatible system is required when connecting with Bluetooth Audio.
- Bluetooth MIDI (MIDI over Bluetooth low energy) compatible system is required with Bluetooth MIDI.

Note: \*USB-OTG cable is required when connecting with USB.

Note: \*Please note that we have discontinued our support for any products not listed in these charts.

Note: \*We have tested new products with the latest versions as of Jan 2019.
